PROFESSIONAL SUMMARY

Java Backend Developer with 2+ years of experience architecting and delivering scalable enterprise applications across ERP and BANKING domains. Proficient in Spring Boot, Hibernate, MySQL, and RESTful API design, with hands-on experience building production-grade systems involving loan lifecycle management, file-based transaction processing, and event-driven architectures using Kafka. Demonstrated ability to deliver full-stack features integrating Angular frontends with secure Spring Security backends in Agile team environments.

TECHNICAL SKILLS

- Languages:** Core Java, Advanced Java
- Frameworks:** Spring Boot, Spring Security, Hibernate / JPA
- Frontend:** Angular, HTML5, CSS3, JavaScript
- Databases:** MySQL — query optimization, schema design, indexing
- Architecture:** RESTful Web Services, MVC, Event-Driven Architecture (Kafka), RBAC
- Tools:** Git, Bitbucket, GitHub, iText5 (PDF generation)
- Concepts:** Loan Lifecycle Management, EMI Calculation, NACH File Processing (XML/TXT 306), Maker-Checker Workflow, CRUD, Excel Data Processing
- Soft Skills:** Analytical Thinking, Leadership, Agile / Scrum Collaboration, Problem Solving

PROFESSIONAL EXPERIENCE

Java Backend Developer · Artcode Private Limited — Pune, India Apr 2024 – Present

- Designed and delivered **RESTful APIs** for enterprise ERP and banking applications using **Spring Boot** and **Hibernate**, supporting concurrent multi-user workflows across production environments.
- Engineered a **role-based authentication system** (Admin, Maker, Checker, Agent) using **Spring Security**, enforcing fine-grained access control across all application modules.
- Integrated **Angular** frontend with secure backend services, building end-to-end features spanning UI interactions, API contracts, and database persistence.
- Developed a comprehensive **loan lifecycle management** module covering Lead capture, Credit Approval, Disbursement, EMI Scheduling, and Loan Closure for a gold loan management platform.
- Implemented **file-based transaction processing** for NACH Credit & Debit workflows, handling XML and TXT (306 format) files with banking-standard validations and error codes.
- Architected **Kafka-based event-driven processing** for system event publishing and asynchronous handling, improving decoupling and throughput in the NACH processing pipeline.
- Optimized **MySQL database queries** and schema design, reducing query execution time and improving application scalability under high data volumes.
- Collaborated cross-functionally with QA and UI teams across **Agile sprint cycles**, consistently delivering features on schedule with minimal post-release defects.

KEY PROJECTS

College ERP System *Java, Spring Boot, Angular, Hibernate, MySQL* 2024

- Built a modular ERP platform with dedicated modules for **HR, Admissions, Parking Security, Library, and ID Card Management**, enabling end-to-end institutional workflow automation.
- Designed and implemented a **role-based access control (RBAC) layer** with distinct permission sets per user role, securing sensitive academic and HR data.
- Developed **RESTful CRUD APIs** and an **Excel-based reporting module** to streamline administrative data exports and reduce manual reporting effort.

- Delivered a **multi-branch gold loan platform** with end-to-end lifecycle management: Lead → Approval → Disbursement → EMI Tracking → Closure.
- Designed a **dynamic ROI and scheme configuration module**, enabling branch managers to define custom interest rates and repayment structures without code changes.
- Built an **automated EMI tracking and notification system**, reducing manual follow-up overhead and improving repayment monitoring accuracy.
- Implemented a **Maker-Checker approval workflow** to enforce dual-control authorization, meeting compliance and audit requirements for financial operations.

- Engineered a **file-based transaction processing engine** for NACH workflows, parsing and validating XML and TXT (306 format) files against banking-standard schemas.
- Developed **INW, RTN, and RTN-ACK handling modules**, implementing RBI-compliant error codes and response generation logic for failed transaction scenarios.
- Integrated **Kafka event publishing** to decouple transaction processing from downstream notification and reconciliation services, enabling asynchronous and fault-tolerant processing.

- Built **backend APIs** powering mobile apps (user and driver) and an admin web panel, supporting real-time order placement, assignment, and tracking workflows.
- Implemented **JWT-based authentication** and a full **order management module** handling order creation, driver dispatch, status transitions, and delivery confirmation.
- Designed a normalized **MySQL database schema** for logistics operations, modeling relationships between customers, drivers, fuel orders, and delivery zones.

- Developed **hazard documentation and contract management modules**, enabling contractors to submit, track, and manage compliance documentation through a structured workflow.
- Implemented **secure multi-role authentication** with a multi-step form submission system and admin dashboard for real-time monitoring of contractor submissions.
- Generated **dynamic PDFs** programmatically using **iText5**, producing formatted compliance certificates and contract summaries on demand.

EDUCATION

Master of Computer Applications (MCA) · Savitribai Phule Pune University — Pune	2024 – 2026 (Pursuing)
Bachelor of Computer Applications (BCA) · Savitribai Phule Pune University — Pune	2021 – 2024 CGPA: 9.5+

CERTIFICATIONS & TRAINING

• Cloud Computing and Distributed Systems — NPTEL Elite Certification, IIT Kanpur	2026
• Cloud Computing — NPTEL Elite Certification, IIT Kharagpur	2026
• Java Full Stack Development — Symbiosis International University (Capgemini Sponsored)	6 Months
• MySQL Implementation Certified Associate — Oracle	

ACHIEVEMENTS & LEADERSHIP

- Achieved a **CGPA of 9.5+** in BCA from Savitribai Phule Pune University, ranking among top performers in the batch.
- **Led and organized college-level technical events**, coordinating logistics, speaker arrangements, and team tasks, developing strong leadership and event management capabilities.
- Completed a **Capgemini-sponsored Full Stack Java certification** at Symbiosis International University, demonstrating initiative to upskill beyond academic curriculum.

LANGUAGES

Marathi (Native) | Hindi (Fluent) | English (Professional Proficiency)
